### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1 & 5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Wilson et al. (# WO 03/029362 A2).

Wilson et al. discloses a method for printing on textile substrate by ink jet process comprising polyurethane copolymer, melamine derivatives as crosslinker, pigment and liquid medium (see Abstract; claims 1, 4, 9; page: 3, line: 1-5; page: 6, line: 1-15). They also discloses a process for preparing colorant preparations for recording fluid comprising a mixture of polyurethane copolymers and one or more melamine derivatives as dispersing binders, water, and water soluble organic solvent, and inorganic colorant, which comprises mixing together in a ball mill (see Examples).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al. (# WO 03/029362 A2).

Wilson et al. discloses all the limitation of the recording fluid. However, they didn't explicitly disclose that the melamine derivatives of the general formula as shown below.

Wilson et al. discloses the melamine derivative. Therefore inherently melamine derivative have same general formula as applicant claimed. Therefore, it is obvious that Wilson et al. discloses melamine derivative general formula.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

(1) Hees et al. (# US 7074850) discloses that the fluid contains the melamine derivative as a crosslinker, and wherein the melamine derivative has a general formula as shown below (column: 7, line: 30-55).
